Pendle Engineering ISO 14001 and BS EN 18001 intention statement

Structure is key to our business success with an integral part of our continual improvement commitment programme to implement and operate a fully integrated management system.

We have successfully operated a Quality management system to ISO 9001:2008 for several years; this is annually assessed by a third party UKAS accredited certification body and in addition to this we also attained 1090 CE marking for Structural Steel to ECX 3 in 2014.

Our aim moving forward in 2015/2016 is to ensure we implement a smooth transition to ISO 9001:2015 and enhance the company structure, operations and environment through completing our Integrated Management System with the addition and third party certification to ISO 14001:2015 Environmental Management System, shortly followed by BS EN 18001:2007 Occupational Health and Safety Management system.

A handwritten signature in black ink, appearing to read "Neil Wilkinson".

Neil Wilkinson
